

National Certification Examination - Post-Examination Results

The Canadian Athletic Therapists Association (CATA) is pleased to announce the completion of the National Certification Examination (NCE) on November 13th, 2021. Results will be available approximately 6 weeks after writing the exam.

This year's NCE was the first to be available in Computer Based Examination format, enabling nearly 300 participants to write the exam from locations across Canada. With the successful completion of this exam, newly certified athletic therapists will use the credential CAT(C) as they begin their careers in Athletic Therapy.

We look forward to supporting these Certified Athletic Therapists as members as they treat the musculoskeletal injuries of all Canadians.
